• Planning Region 12	Page 323
• Planning Region 13	Page 350
• Planning Region 14	Page 377

Background

Current research built on the Colorado Study of TBI Prevalence and Associated Outcomes which was:

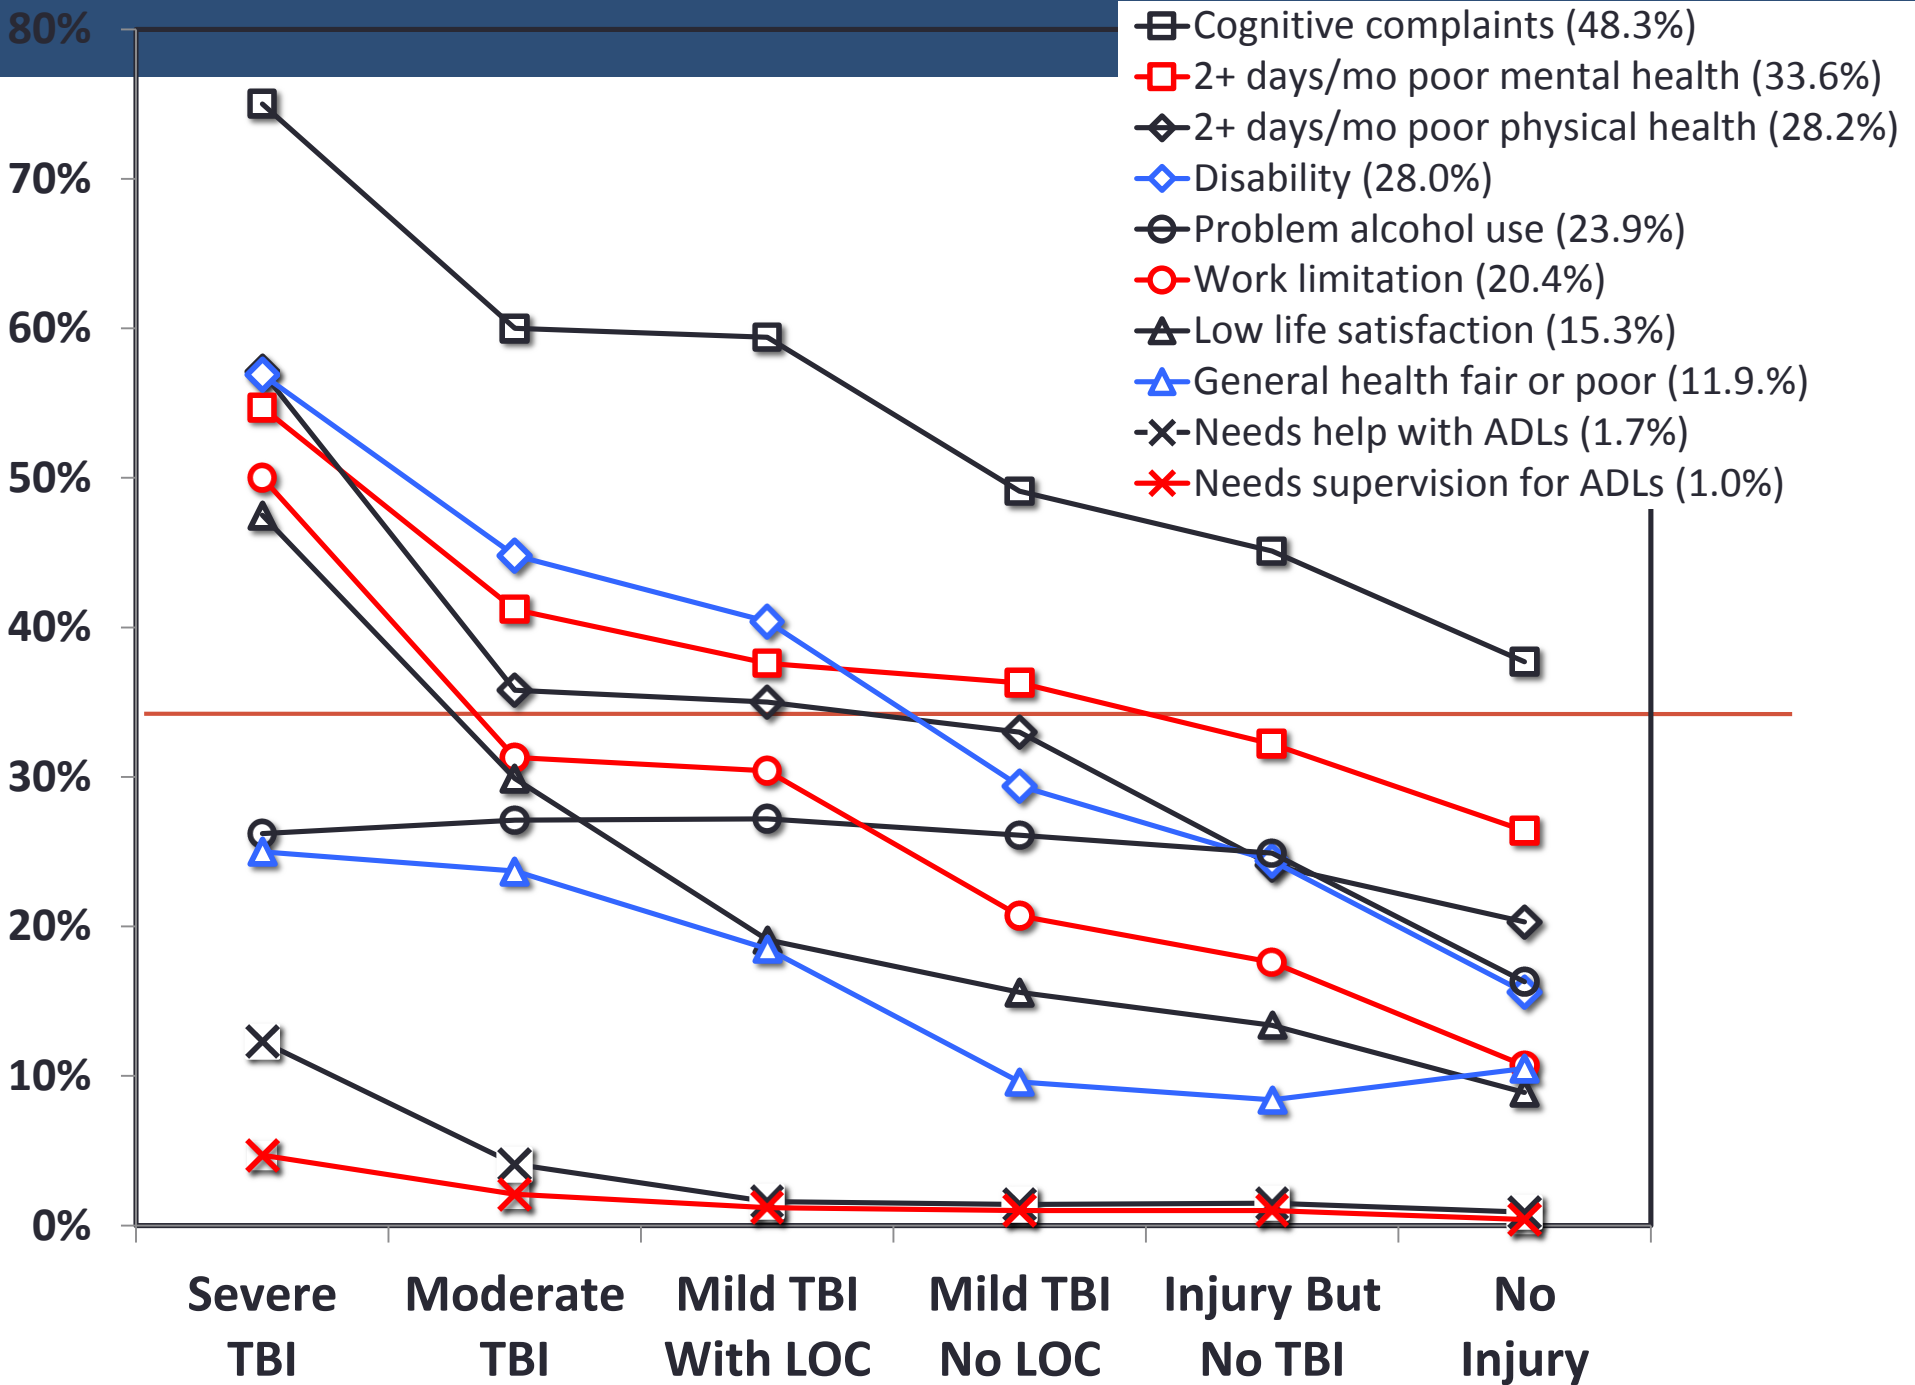

- CDC funded
- Statewide population-based survey of a random member of random-digit-dialed households.
- 2,701 adults age 18 and over interviewed using a modified CATI version of the OSU-TBI-ID
- To gather the lifetime history of TBI
- And standardized current assessments of 11 post-concussive symptoms and 10 negative outcomes

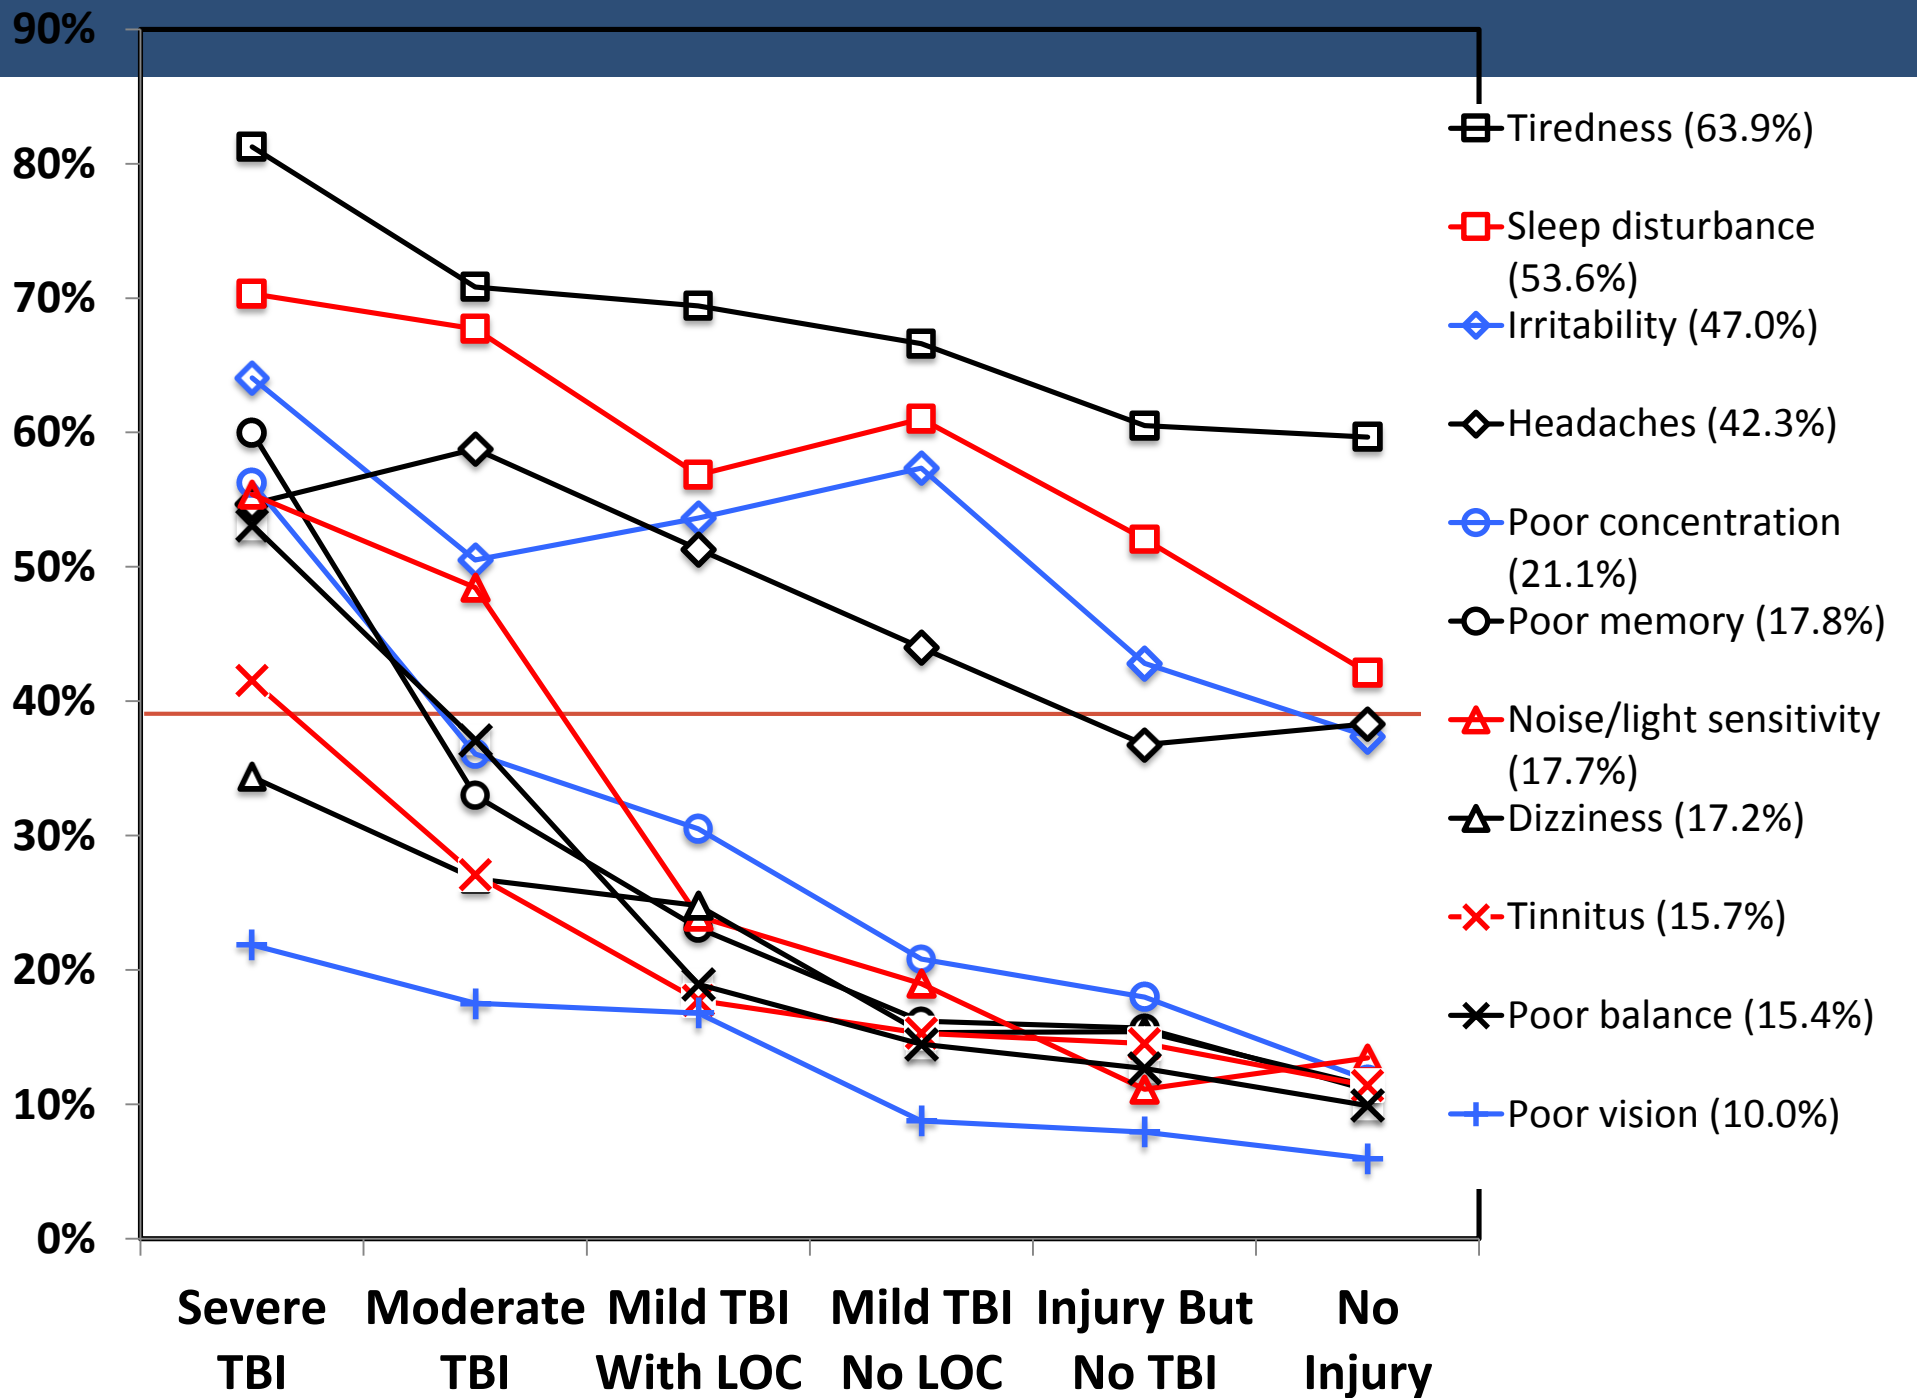

Raking and Weighting

- Raked the characteristics of the 2,701 people interviewed to the characteristics of the Colorado population age 18 and over
- Based on 2010 Census characteristics (including age; gender; race/ethnicity; marital, education, and employment status; and household income)
- Starting with a base weight of 1.0
- And iterating until all characteristics matched

Colorado Study Publications

- Whiteneck GG, Cuthbert JP, Corrigan JD, Bogner JA. Prevalence of Self-Reported Lifetime History of Traumatic Brain Injury and Associated Disability: A Statewide Population-Based Survey. J Head Trauma Rehabil. 2016 Jan-Feb;31(1):E55-62.
- Whiteneck GG, Cuthbert JP, Corrigan JD, Bogner JA. Risk of Negative Outcomes After Traumatic Brain Injury: A Statewide Population-Based Survey. J Head Trauma Rehabil. 2016 Jan-Feb;31(1):E43-54.
- Cuthbert JP, Whiteneck GG, Corrigan JD, Bogner J. The Reliability of a Computer-Assisted Telephone Interview Version of the Ohio State University Traumatic Brain Injury Identification Method. J Head Trauma Rehabil. 2016 Jan-Feb;31(1):E36-42.

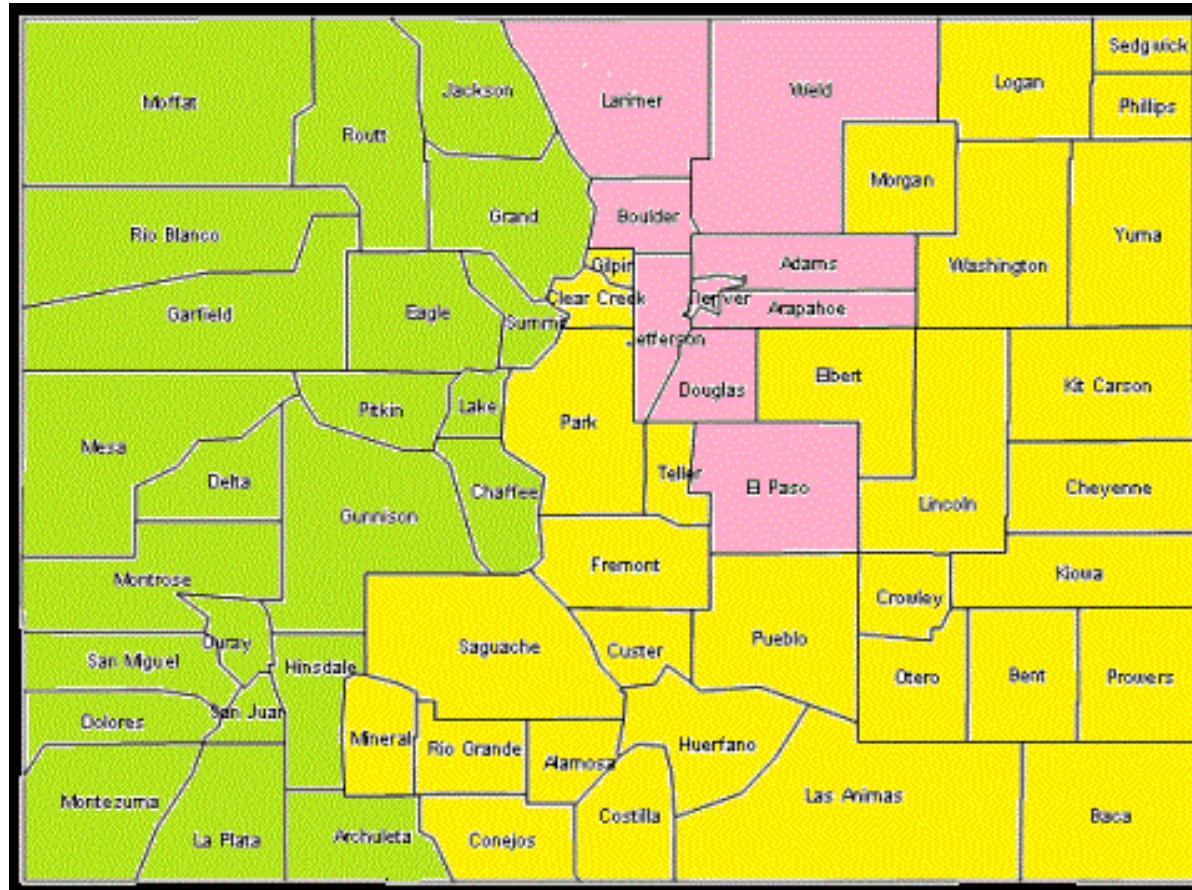

Current Research Objectives

- To estimate the number of adults with a lifetime history of TBI
- And estimates of the numbers of people with TBI and 10 current negative outcomes as well as 11 post-concussive symptoms
- In each of 14 planning regions of Colorado
- To facilitate service delivery planning.

Current Research Methodology

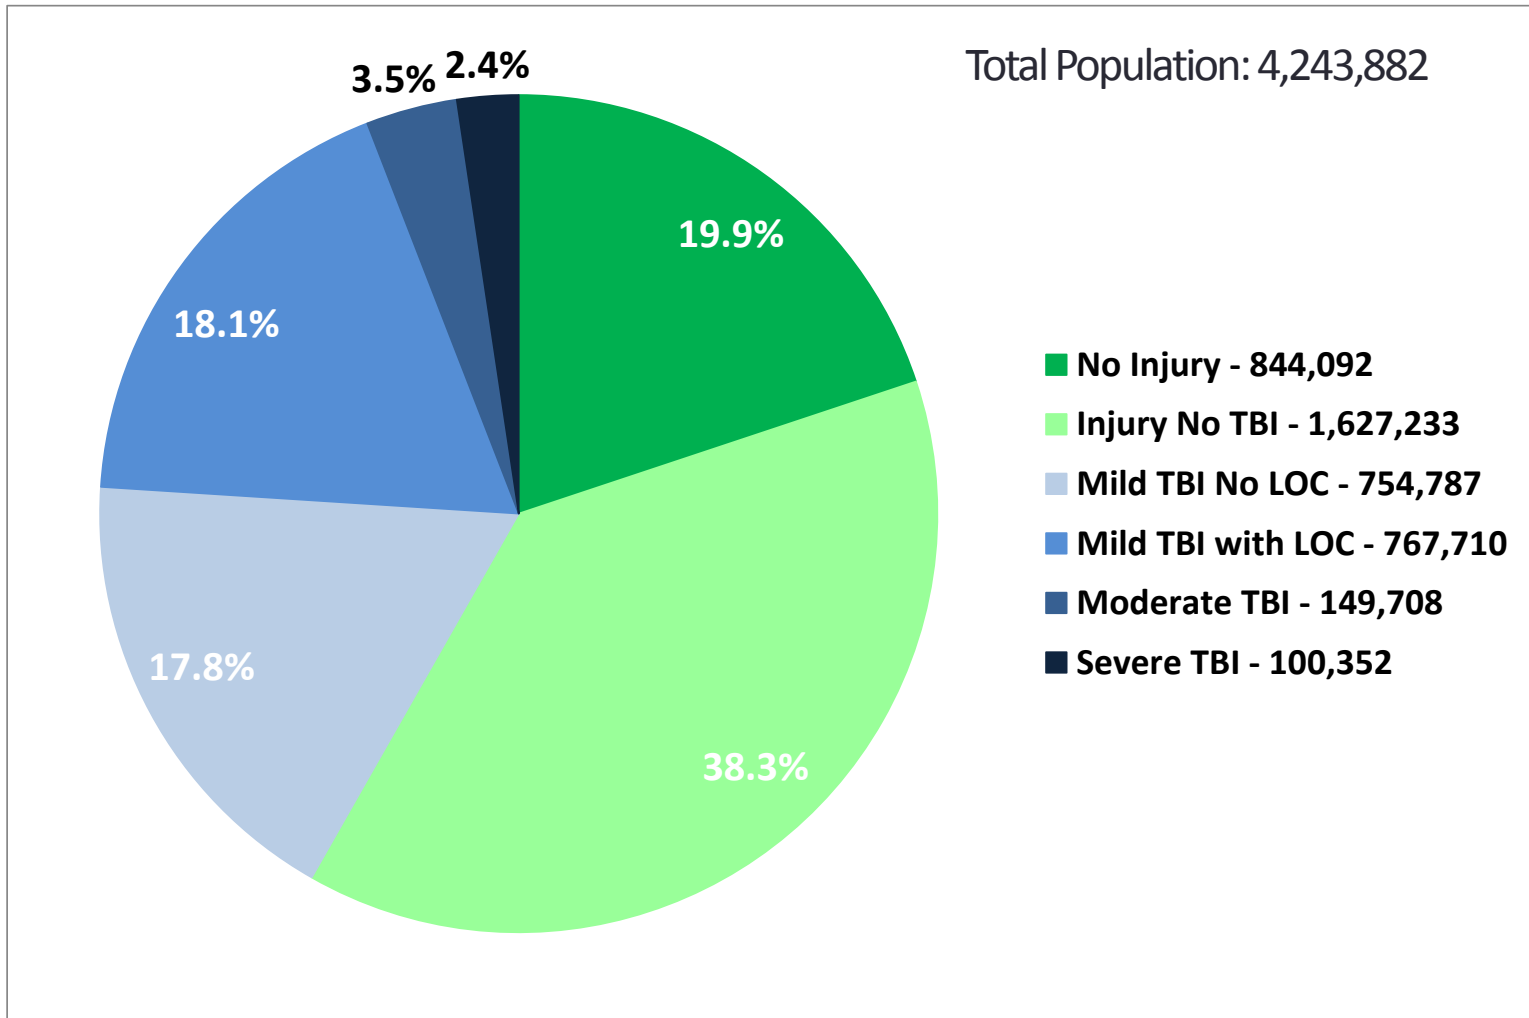

- Secondary data analysis of the original study data
- Compare the population characteristics and rates of TBI in 3 large geographic areas of Colorado
 - The urban front-range counties
 - The western slope counties
 - The remaining non-urban, non-western slope counties in the east and south
- Use the respondents in these 3 large geographic areas to estimate TBI and outcomes in the 14 planning regions

Three Large Geographic Areas of Colorado

Statewide Data

Prevalence of TBI in Colorado

Statewide Injuries by Sex

Statewide Injuries by Age Groups

Statewide Injuries by Race

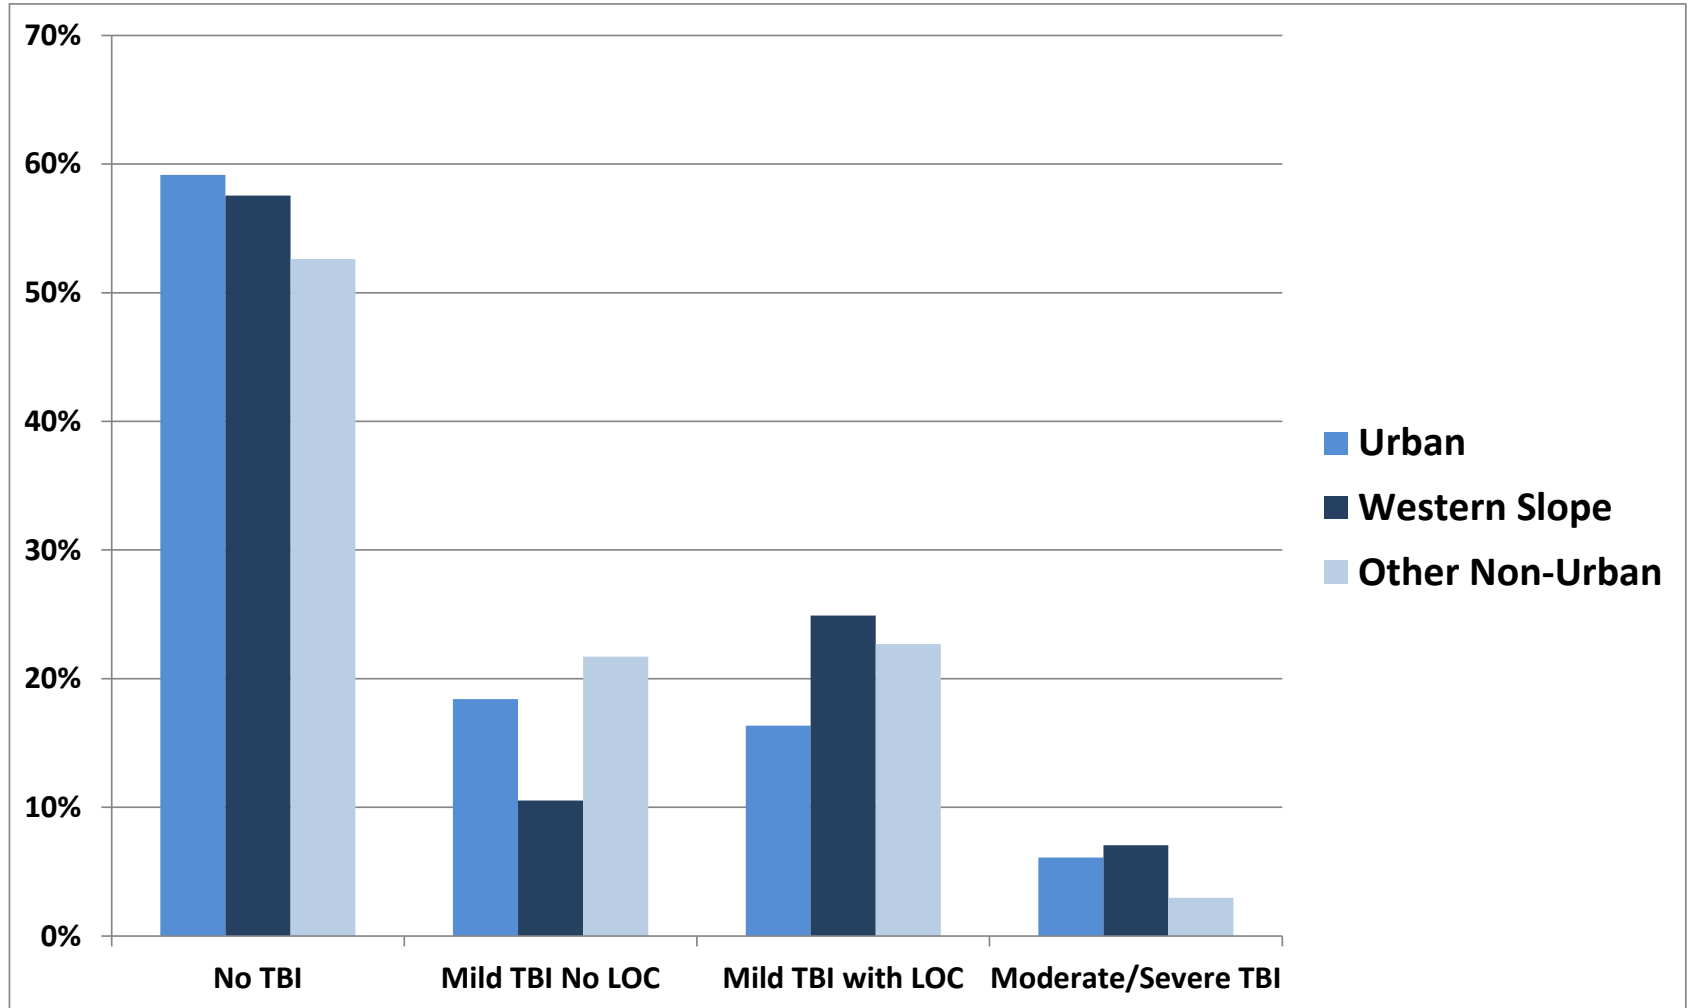

Gender Differences in Colorado

Age Differences in Colorado

TBI Prevalence Differences in Colorado

Current Research Raking and Weighting

- Raked the characteristics of people interviewed in the 3 large areas to the characteristics of the population age 18 and over in each of the 14 planning districts
- Based on 2016 population age and gender distributions of each planning district provided by the Colorado Office of Demography
- With the base weight as the original study weight
- And iterating until the characteristics matched

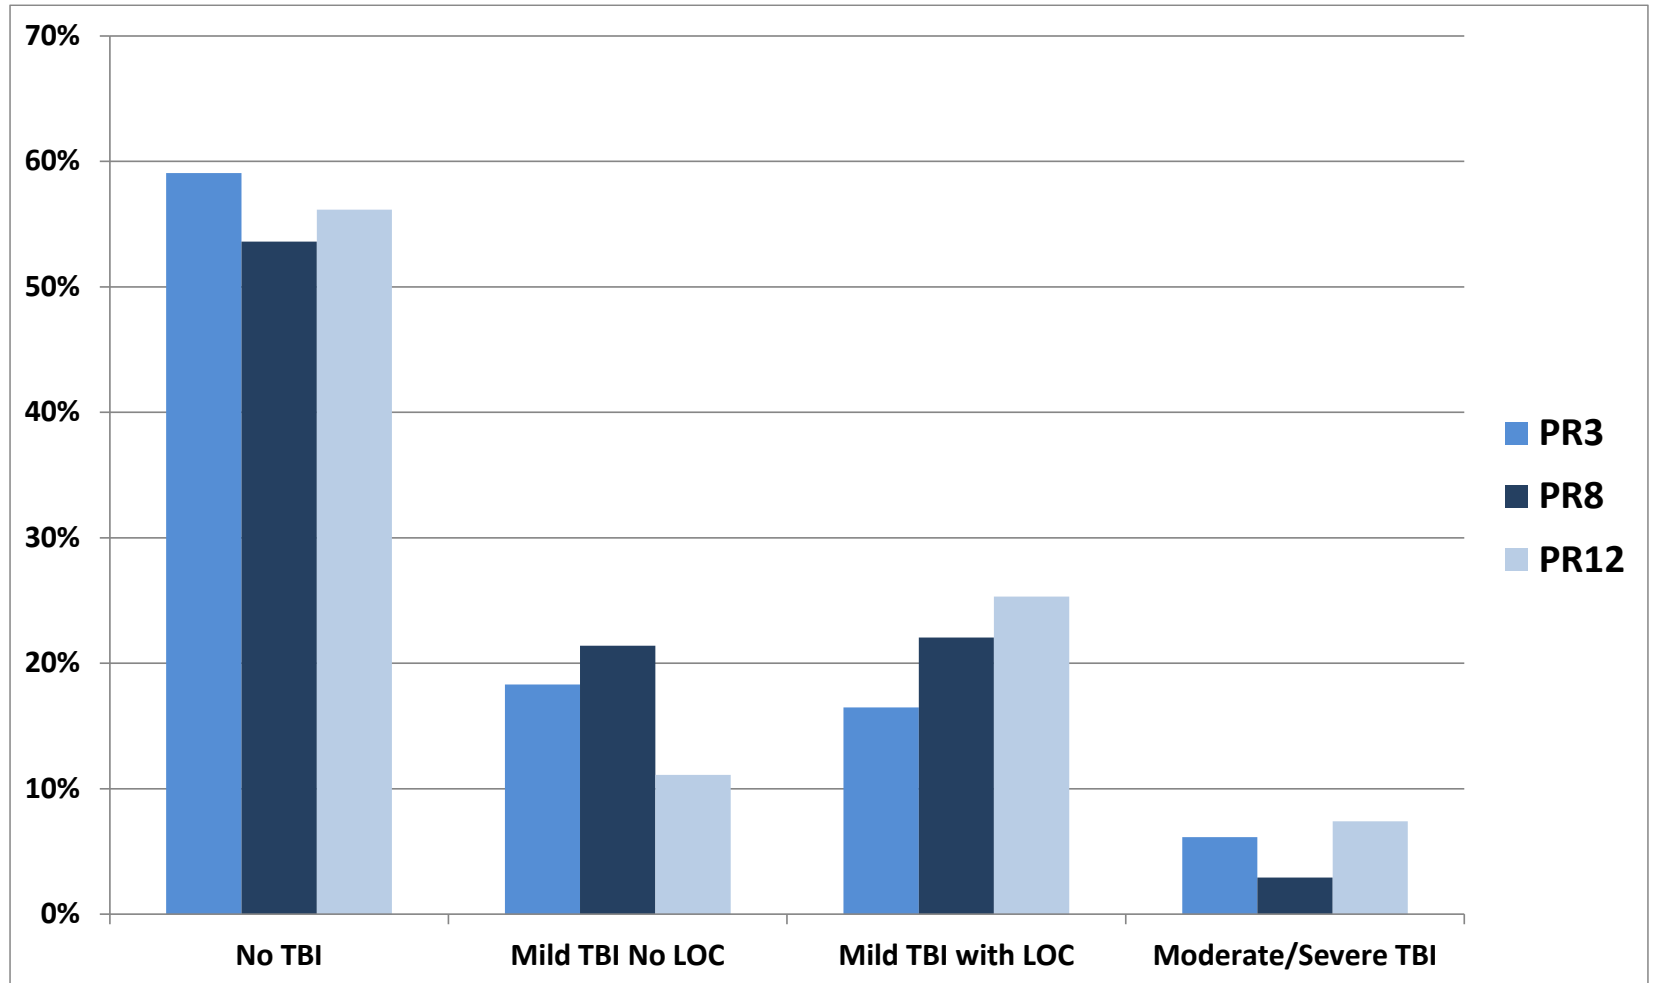

Gender Differences in Planning Regions

Age Differences in Planning Regions

TBI Prevalence Differences in Planning Regions

Closing Cautions

- These are only estimates
- Based on the self-reports
- Of 2,701 adult Coloradans
- With no estimates about TBI in children
- And no ability to infer causation, just association
- But hopefully helpful to TBI advocates and TBI service providers

Thank You

Planning Region 1

Planning Region 1 Age 18+: 6 Injury Groups

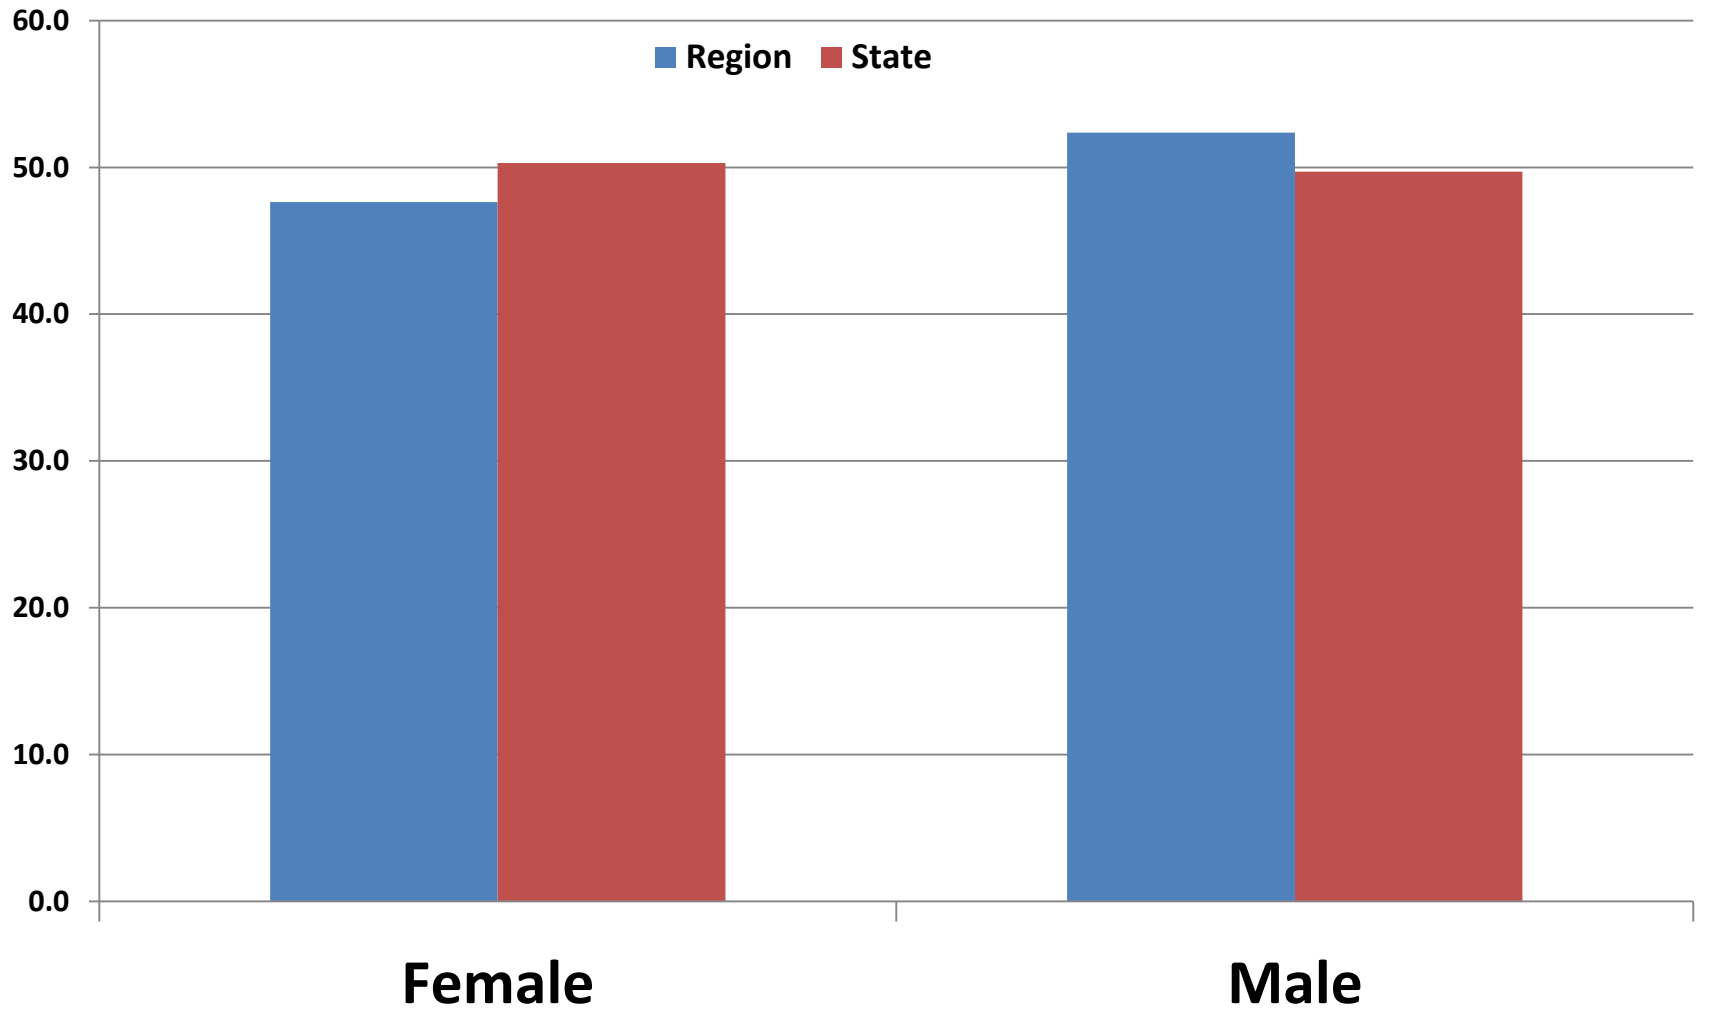

Total Population: 55,303

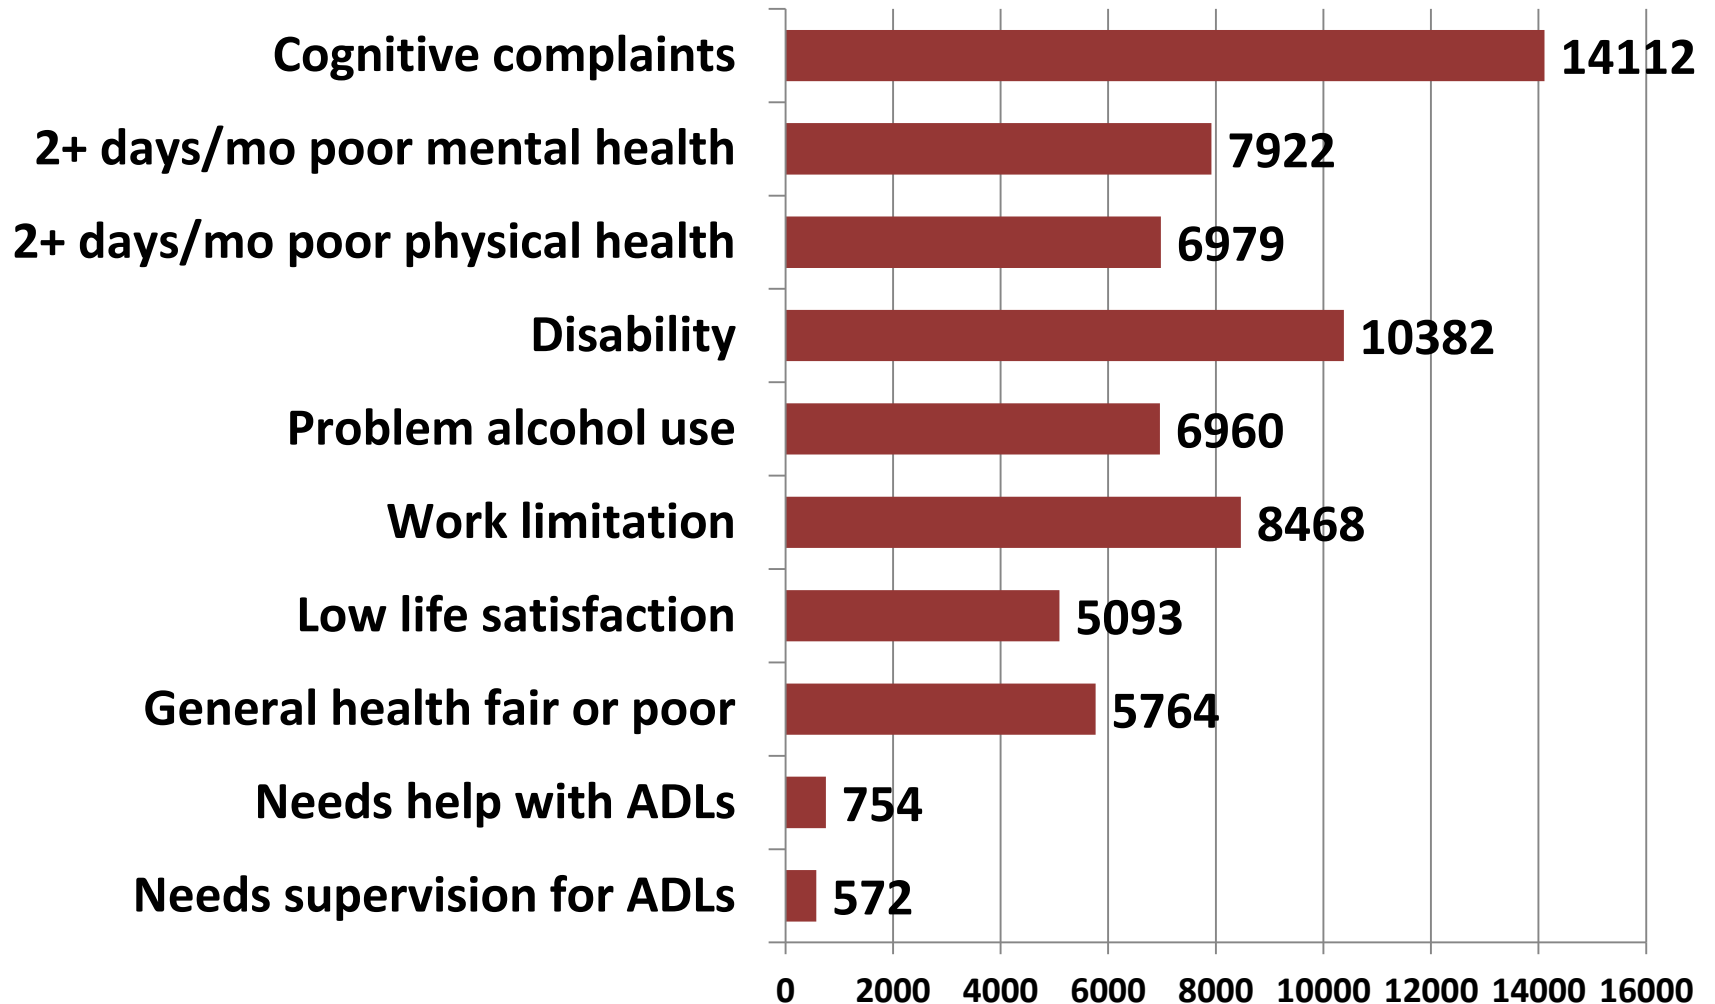

Planning Region 1 Population by Age

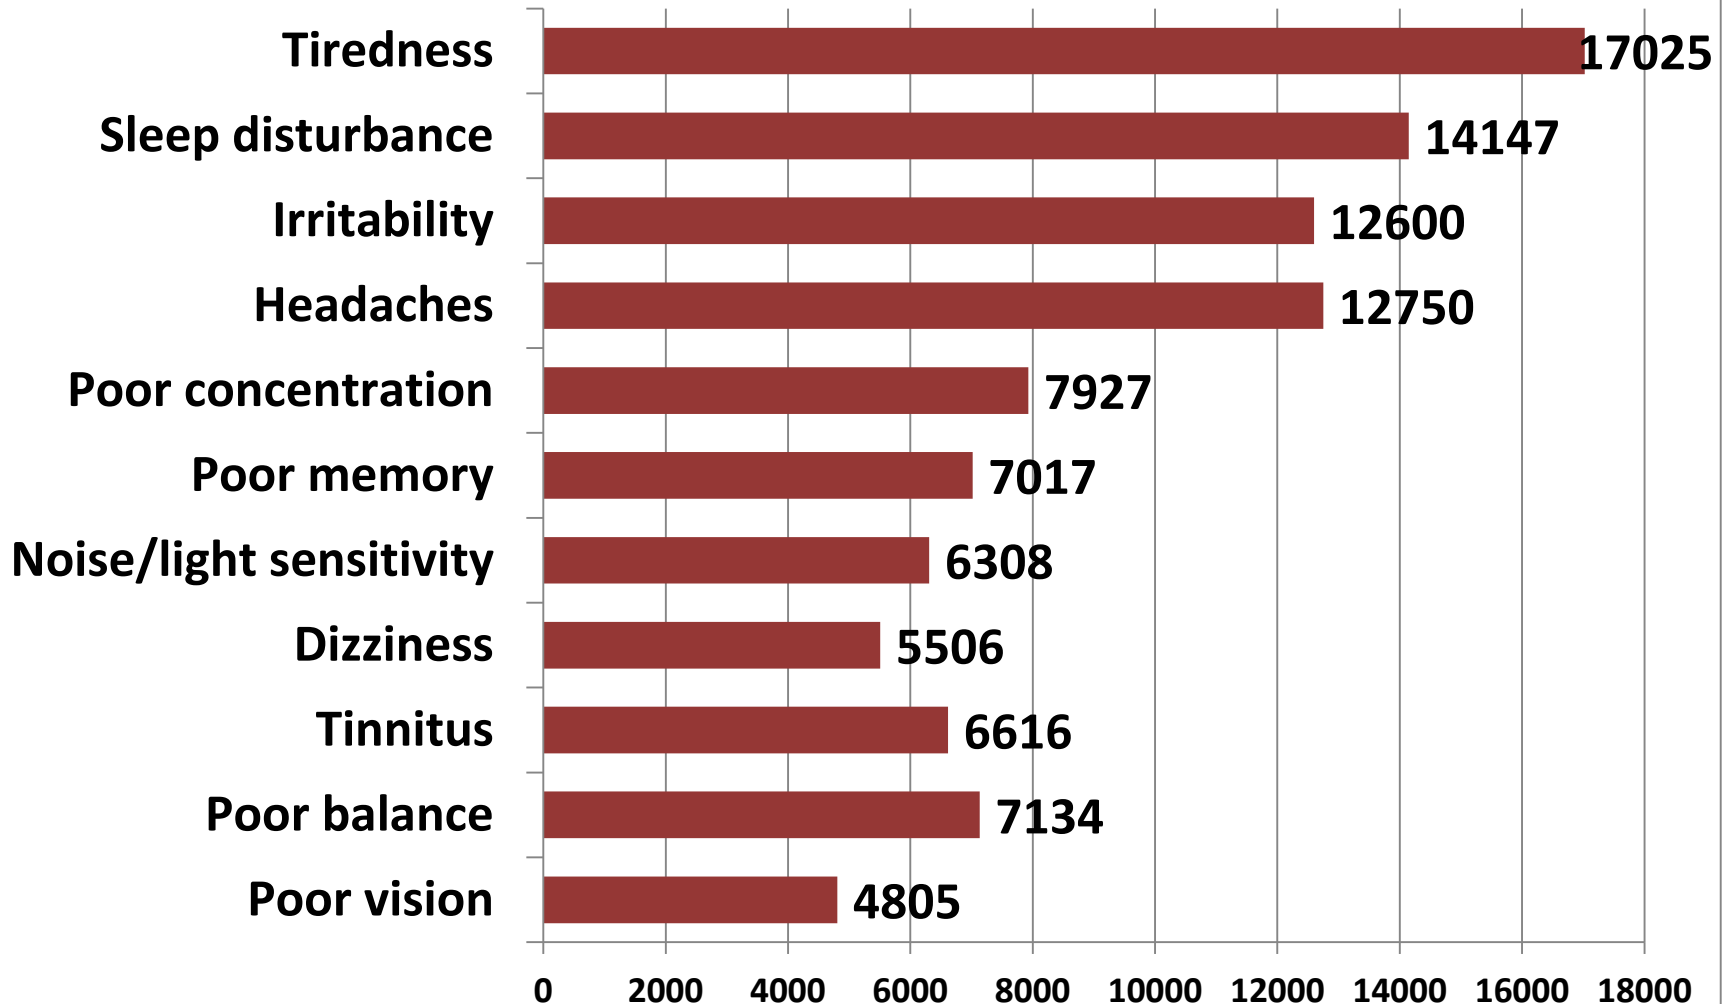

Planning Region 1 Population by Sex

Planning Region 1

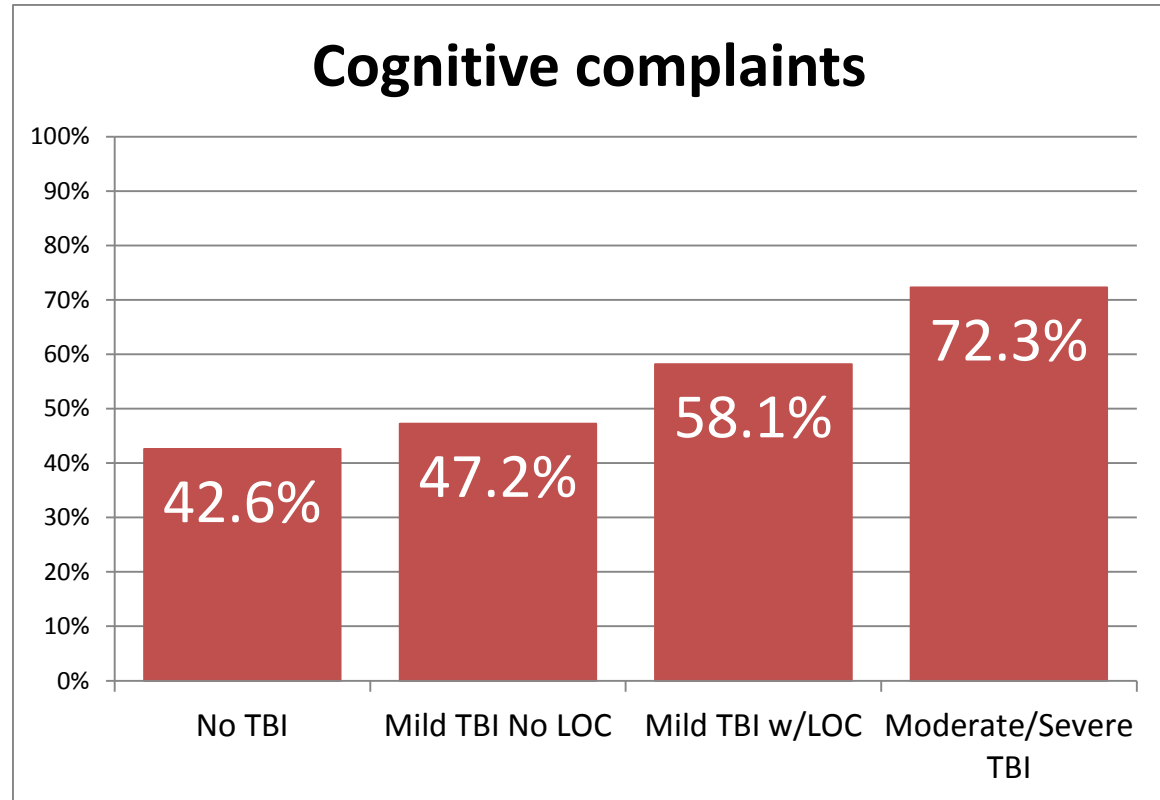

Poor Outcomes Among People with TBI

Planning Region 1

Postconcussive Symptoms Among People with TBI

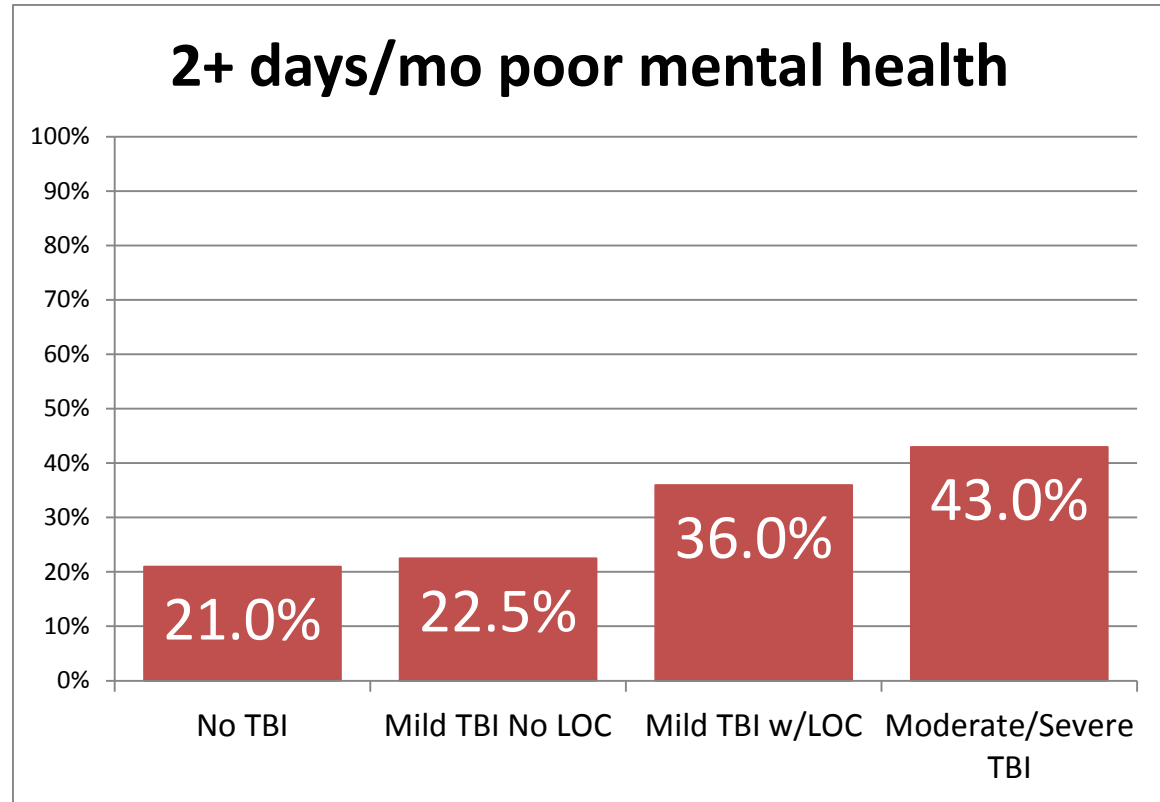

Planning Region 1

- Endorsement of any cognitive complaints on the Alertness Behavior Subscale of the Sickness Impact Profile

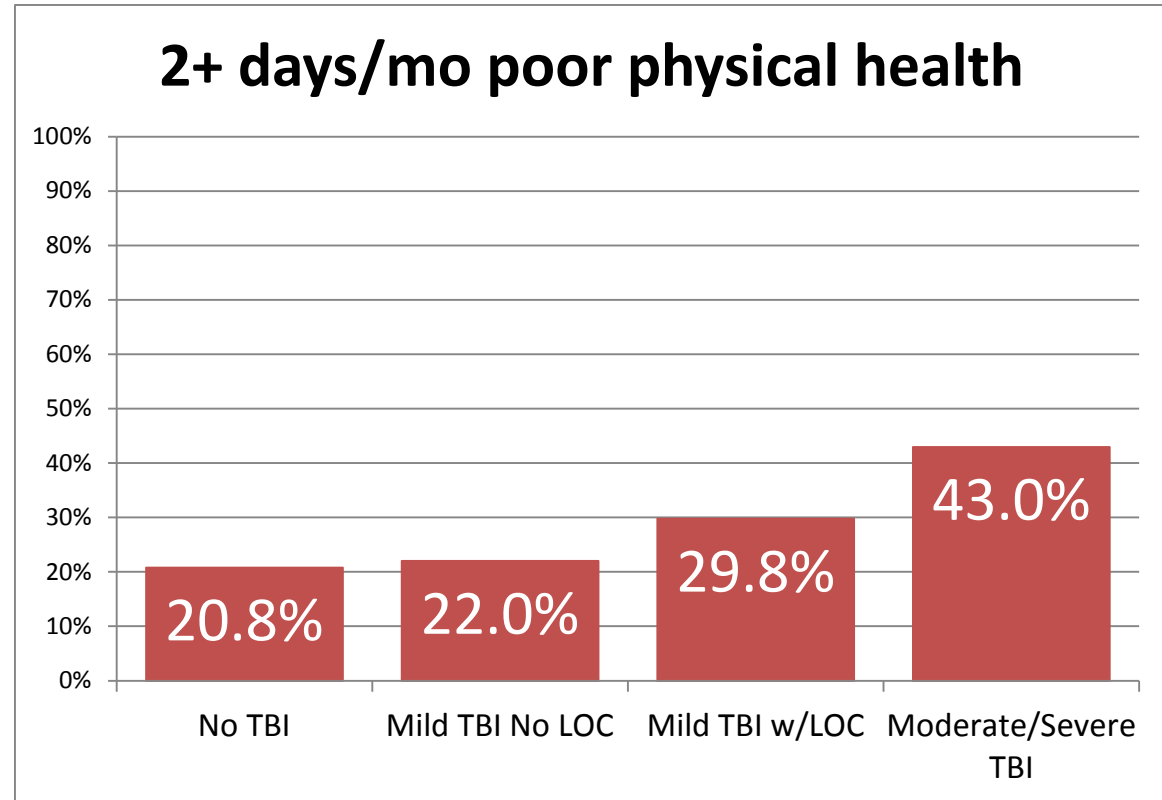

Planning Region 1

■ Two or more days of poor mental health reported

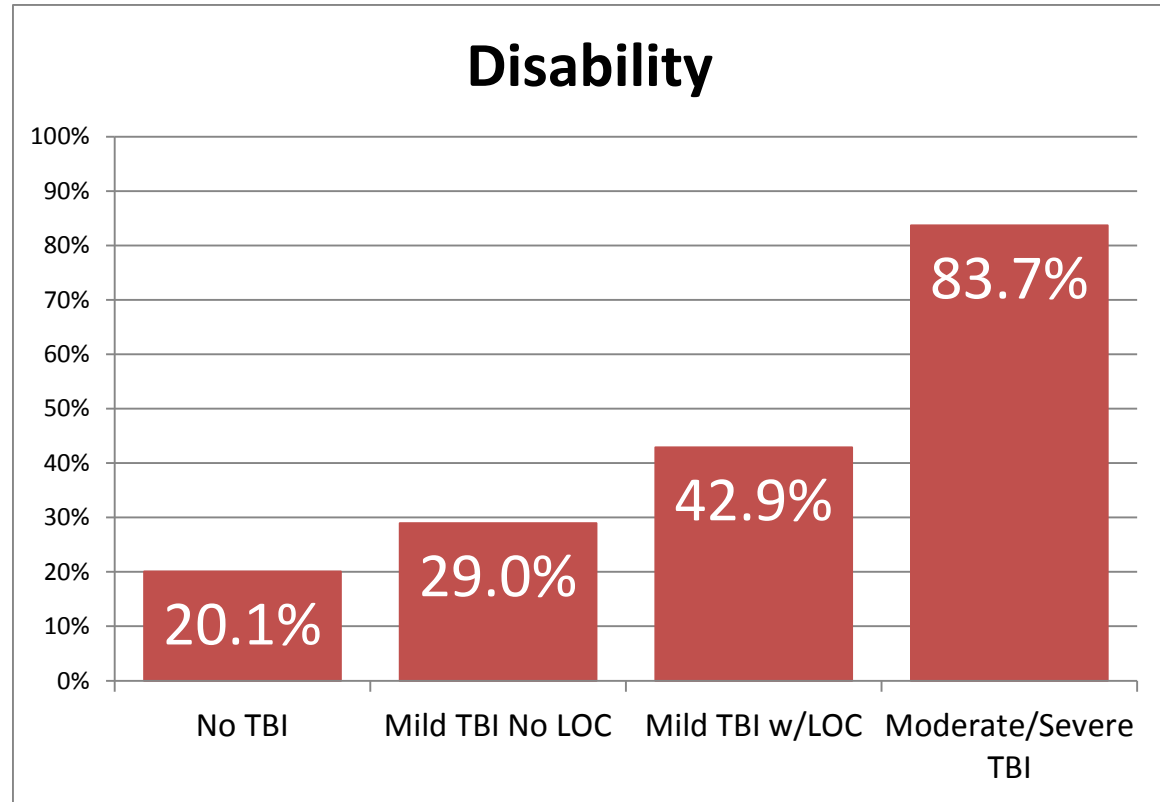

Planning Region 1

■ Two or more days of poor physical health reported

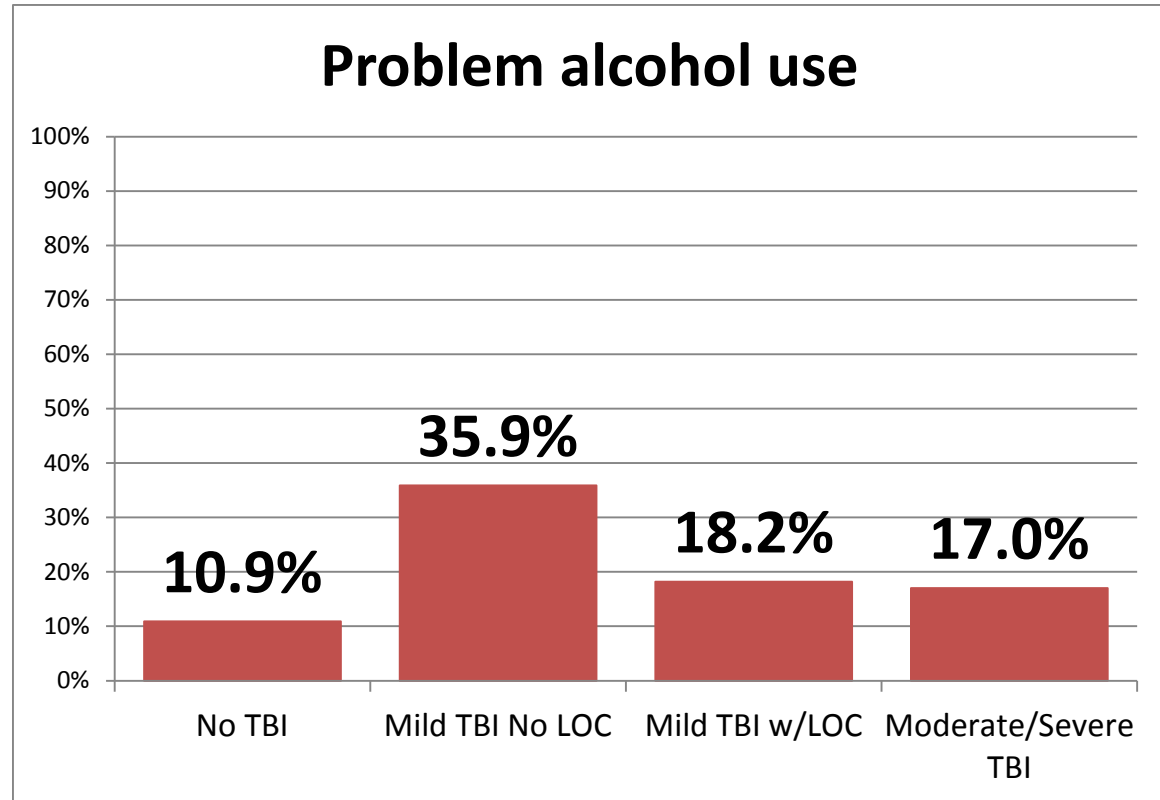

Planning Region 1

■ Limited in any activities
or use special
equipment

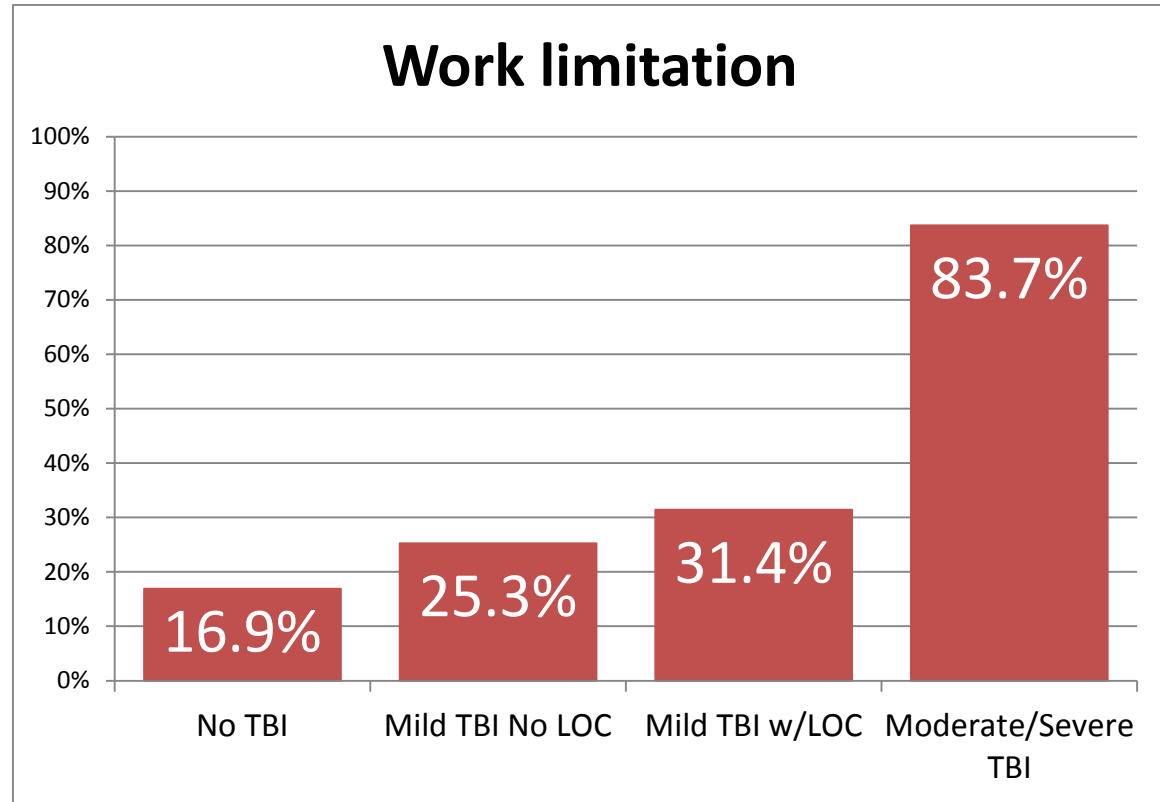

Planning Region 1

- More than 2 drinks per day for men (1 for women) or 5+ drinks in one sitting

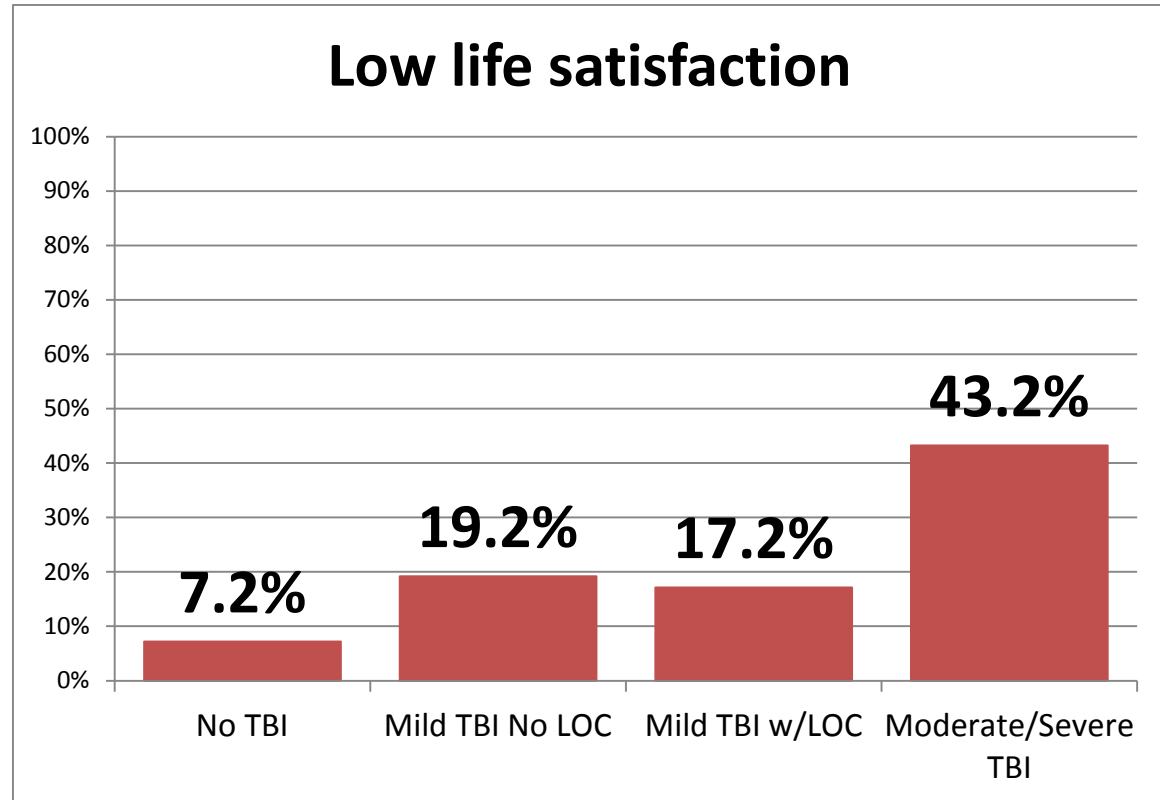

Planning Region 1

- Limited in the kind or amount of work you can do

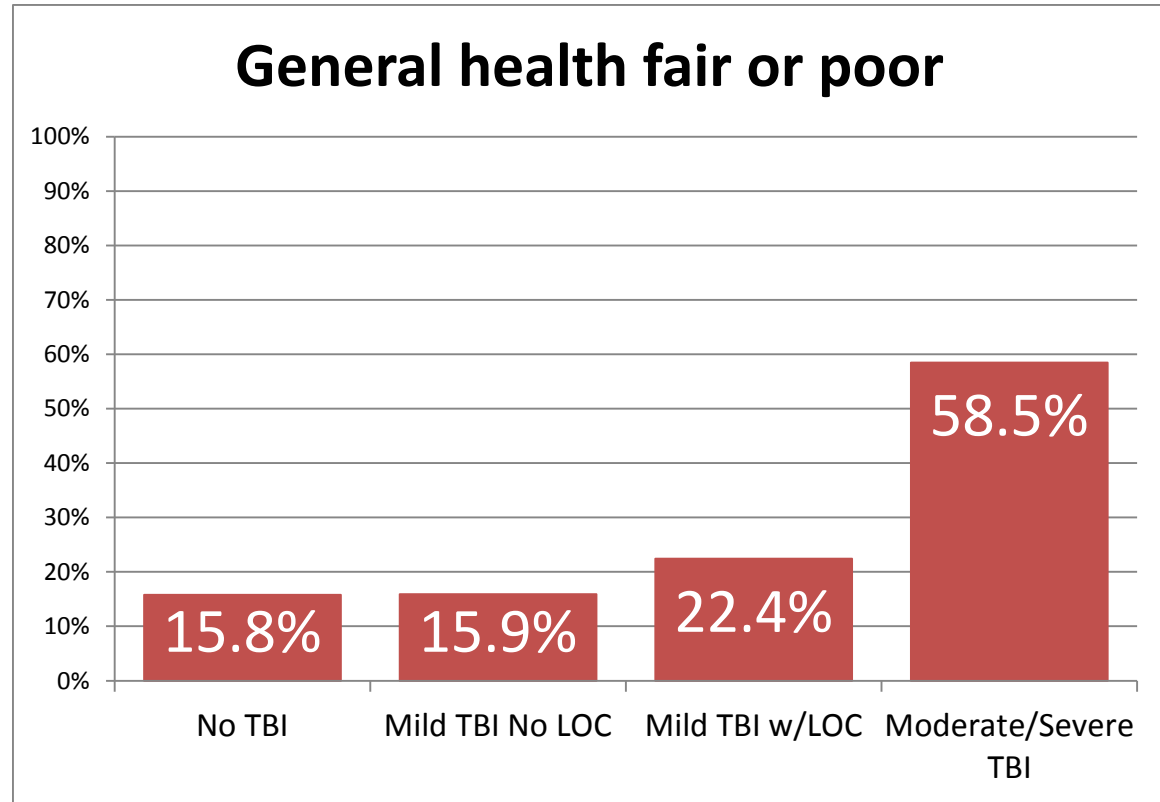

Planning Region 1

■ Below average score on
Diener Satisfaction with
Life Scale

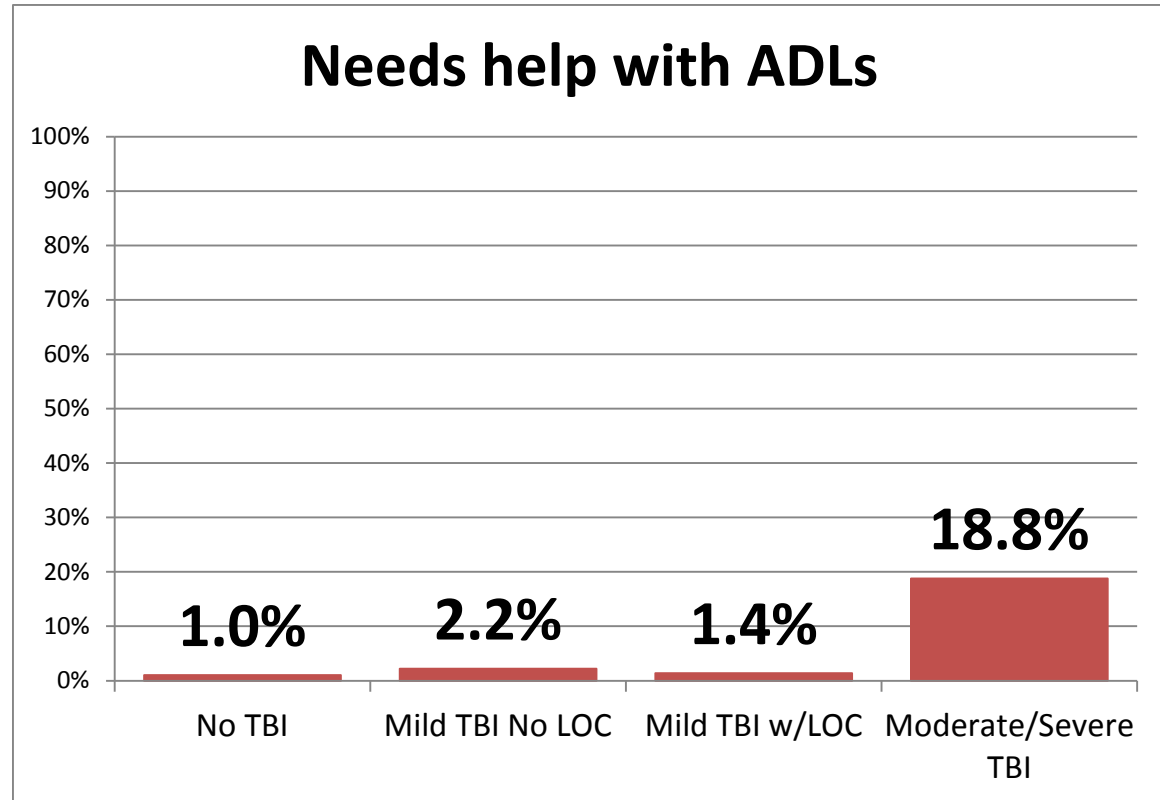

Planning Region 1

■ General health is fair or poor

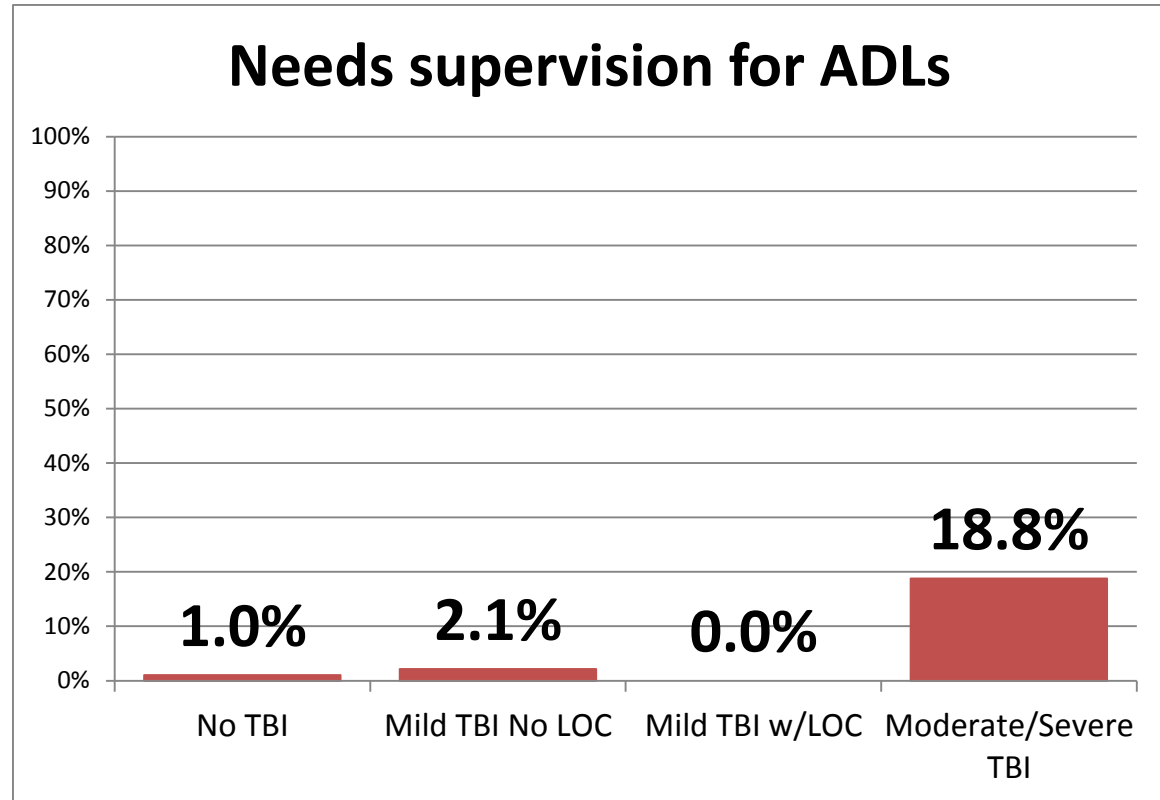

Planning Region 1

- Need help from another person with activities of daily living

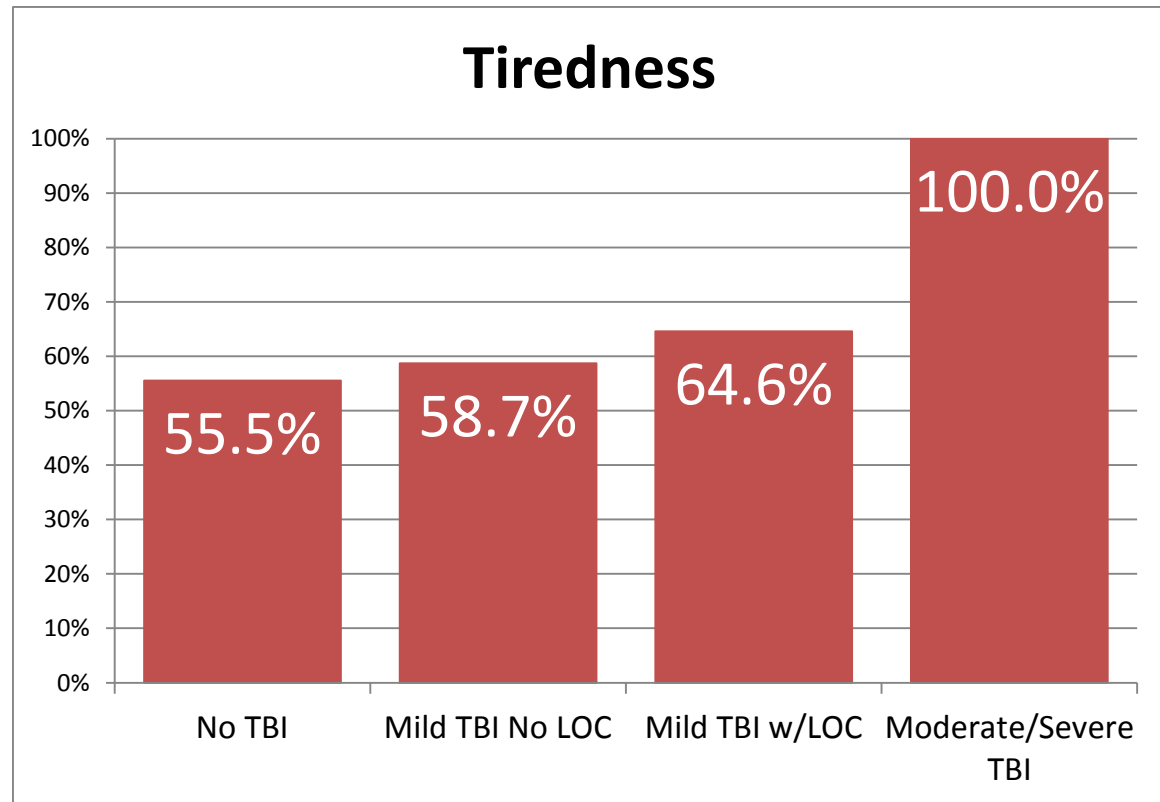

Planning Region 1

- Need to be reminded or supervised when doing activities of daily living

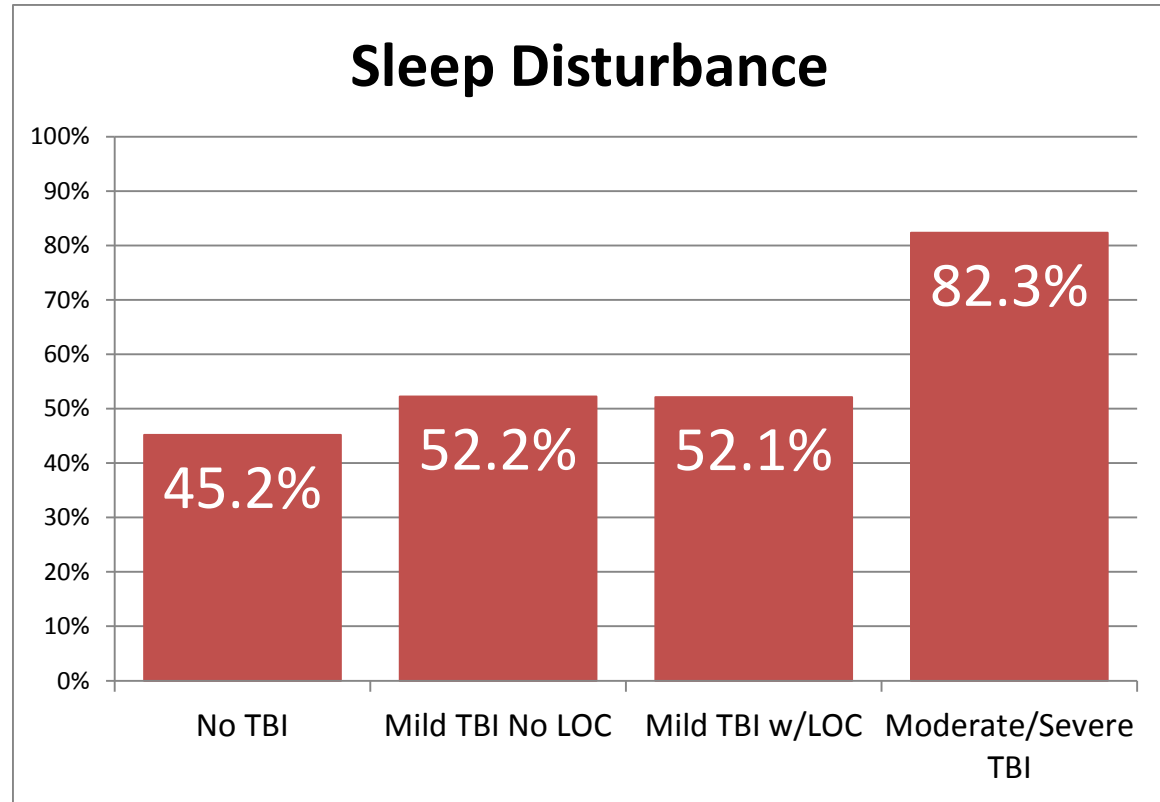

Planning Region 1

■ Reported tiredness
several days or more
per month

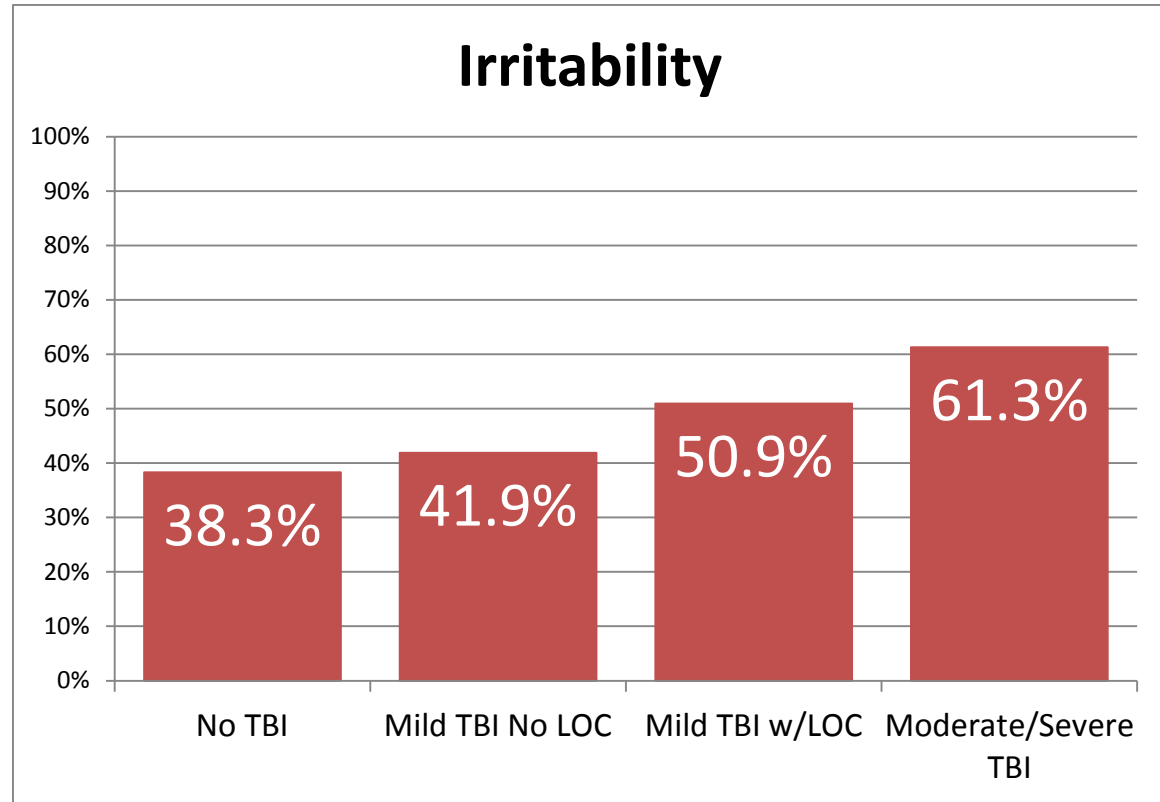

Planning Region 1

■ Reported sleep disturbance several days or more per month

Planning Region 1

■ Reported irritability
several days or more
per month

Planning Region 1

- Reported headaches several days or more per month

Planning Region 1

■ Reported poor concentration several days or more per month

Planning Region 1

- Reported poor memory several days or more per month

Planning Region 1

■ Reported noise/light sensitivity several days or more per month

Planning Region 1

- Reported dizziness several days or more per month

Planning Region 1

- Reported tinnitus several days or more per month

Planning Region 1

■ Reported tiredness
several days or more
per month

Planning Region 1

■ Reported tiredness
several days or more
per month

Planning Region 2

Planning Region 2 Age 18+: 6 Injury Groups

Total Population: 483,070

Planning Region 2 Population by Age

Planning Region 2 Population by Sex

Planning Region 2

Poor Outcomes Among People with TBI

Planning Region 2

Postconcussive Symptoms Among People with TBI

Planning Region 2

- Alertness Behavior Subscale of the Sickness Impact Profile – endorsement of any of 16 items like “I have difficulty reasoning and solving problems.”

Planning Region 2

■ Two or more days of poor mental health reported

Planning Region 2

■ Two or more days of poor physical health reported

Planning Region 2

- Limited in any activities or use special equipment

Planning Region 2

- More than 2 drinks per day for men (1 for women) or 5+ drinks in one sitting

Planning Region 2

- Limited in the kind or amount of work you can do

Planning Region 2

- Below average score on Diener Satisfaction with Life Scale

Planning Region 2

■ General health is fair or poor

Planning Region 2

- Need help from another person with activities of daily living

Planning Region 2

- Need to be reminded or supervised when doing activities of daily living

Planning Region 2

■ Reported tiredness
several days or more
per month

Planning Region 2

■ Reported sleep disturbance several days or more per month

Planning Region 2

- Reported irritability several days or more per month

Planning Region 2

- Reported headaches several days or more per month

Planning Region 2

- Reported poor concentration several days or more per month

Planning Region 2

- Reported poor memory several days or more per month

Planning Region 2

■ Reported noise/light sensitivity several days or more per month

Planning Region 2

- Reported tiredness several days or more per month

Planning Region 2

- Reported tinnitus several days or more per month

Planning Region 2

- Reported poor balance several days or more per month

Planning Region 2

- Reported poor vision several days or more per month

Planning Region 3

Planning Region 3 Age 18+: 6 Injury Groups

Total Population: 2,397,584
